1100 MILES OF UNUSED SUPER BROADBAND RUNNING THROUGH OUR STATE HAS ALREADY BEEN PAID FOR BY OUR FEDERAL GOVERNMENT

HELP MAINE GO FROM WORST TO FIRST!

Maine’s internet offerings are ranked 49th in the U.S.—equal to that of a third world country—and we are literally sitting on top of the solution.

We need to develop plans in order to get funding to link into the EXISTING ULTRA FAST INTERNET. By doing so we can offer some of the FASTEST INTERNET ON THE PLANET!

Imagine what this can do to attract new business to our state. Healthcare, education and government services will benefit tremendously, and homeowners statewide will receive much BETTER service at a SIGNIFICANTLY LOWER RATE. This will create extra disposable income that can go into our economy.

WE’RE VERY CLOSE TO BEING CONNECTED. WE NEED YOUR HELP.

See the reverse side to learn how to make the DIFFERENCE.
CREATE JOBS
ATTRACT BUSINESS
BRING PEOPLE BACK HOME

LET'S GET STARTED
In this two-tiered process, 25 communities will be selected for a planning grant. Once the planning process is complete, the full grant can be applied for, which will get your community connected to some of the fastest internet available anywhere.

GET YOUR MUNICIPAL BROADBAND FUNDS

1) APPLY FOR A $25,000 PLANNING GRANT ($5K MATCH)
Each interested town or municipality will apply for a municipal planning grant. 25 Selected communities will receive $20,000 toward the $25,000 cost of the municipal planning process.

2) BECOME A BROADBAND-CERTIFIED COMMUNITY
Upon completing the formal planning process your community will become a certified community, eligible to apply for the $200,000 grant.

3) APPLY FOR $200,000 GRANT AT THE STATE LEVEL ($50K MATCH)
25 communities will be awarded, 15 of which will be economically challenged. Each community will need to put up $50K to receive the $200,000 grant.

4) IMPLEMENT BROADBAND INTERNET
This initial cash infusion should be enough to get your community connected, reaching core businesses and immediate town centers, anchor institutions, government agencies and services. More outlying areas can be rolled out subsequently.

YOUR MUNICIPAL TEAM
This process will be a collaborative effort with various members of your community. Helpful team members might include your chamber of commerce, local county or city economic development team members, municipal leaders, the general public, business stakeholders and anyone who uses technology.
