

May 4, 2010

The Honorable Joe Hackney  
Speaker  
North Carolina House of Representatives  
2304 Legislative Office Building  
Raleigh, NC 27601-1096

Senator Marc Basnight  
President Pro Tempore  
16 W. Jones Street, Room 2007  
Raleigh, NC 27601-2808

Dear Speaker Hackney and Senator Basnight:

We, the undersigned private-sector companies and trade associations, urge you to oppose any legislation that would place a moratorium on public broadband deployments in North Carolina. Such a bill would harm both the public and private sectors. It would thwart public broadband initiatives, stifle economic growth, prevent the creation or retention of thousands of jobs, and diminish quality of life in North Carolina. In particular, it would hurt the private sector in several ways: by undermining public-private partnerships; by hamstringing the private sector's ability to sell goods and services in North Carolina; by interfering with workforce development; and by stifling creativity and innovation.

The United States continues to suffer through one of the most serious economic crises in decades. To address these concerns, Congress and the Obama Administration have made more than \$7 billion available to catalyze both public and private efforts to accelerate the deployment, adoption and use of broadband infrastructure and services. The Federal Communications Commission's National Broadband Plan also admonishes states not to interfere with community broadband efforts where local officials do not believe that the private sector is acting fast enough or well enough to meet the community's broadband needs. Consistent with these expressions of national policy, public entities across America, including North Carolina, are doing their share to bring affordable high-capacity broadband connectivity to all Americans. Enactment of a counterproductive municipal broadband moratorium would thus not only hurt both the public and private sectors, but it would also put North Carolina conspicuously at odds with national broadband policy.

We support strong, fair and open competition to ensure users can enjoy the widest range of choice and opportunities to access content online, which is the heart of economic development in an information-based global market. A municipal broadband moratorium is a step in the wrong direction. North Carolina should be lowering barriers to public broadband initiatives rather than establishing new ones, so that we and other high technology companies can spread and prosper across this beautiful state. Please oppose any moratorium or limitation on municipal broadband deployments

Sincerely,

**Alcatel-Lucent, American Public Power Association, Atlantic-Engineering, Fiber to the Home Council (FTTHC), Google, Intel, Telecommunications Industry Association (TIA), United Telecom Council (UTC)**
